Virginia Department of Rehabilitative Services Human Research Review Committee Annual Report SFY 2010

The *Code of Virginia* §51.5-14.01 directs the Department of Rehabilitative Services' (DRS) Human Research Review Committee (HRRC) to submit to the Governor, the General Assembly, and the DRS Commissioner, at least annually, a report on the human research projects reviewed and approved by the HRRC, including any significant deviations from the research applications as approved by the Committee. The HRRC has internal oversight responsibilities for ensuring protection of the rights and welfare of DRS clients and employees who volunteer to participate in research conducted or authorized by DRS. The DRS Commissioner established the HRRC in August 2000 to review and approve research to be conducted or authorized by DRS, the Woodrow Wilson Rehabilitation Center (WWRC), Centers for Independent Living (CIL) and Employment Services Organizations (ESO) that have a vendor relationship with DRS.

The HRRC also complies with federal requirements for the *Protection of Human Subjects* (45 CFR 46). The U.S. Department of Health and Human Services approved the HRRC Federal wide Assurance (FWA#00008936) beginning August 15, 2005. The FWA is currently effective through September 25, 2011.

The Human Research Review Committee (HRRC) conducts three types of reviews: Exempt Review (regulatory oversight not required), Expedited Review (application reviewed and approved by one or more HRRC members) and Full Committee Review (a quorum of members in attendance). Eight new applications were reviewed during the State Fiscal Year 2010. Three were approved by Exempt Review, and seven were approved by Expedited Review. The HRRC also conducted three continuing/amended reviews to previously approved studies, and received two study closures.

To the best of the Committee's knowledge, all research involving human volunteers conducted or authorized by DRS or the WWRC during SFY 2010 was reviewed by the HRRC. The HRRC has no evidence suggesting that there were any significant deviations from study procedures as approved by the HRRC for the studies that were reviewed and approved by the DRS HRRC during SFY 2010.

Composition of the Committee is governed by 22 VAC 30-40-60 and 45 CFR 46.107. As of June 30, 2010, the HRRC had seven members and 2 two alternates.

This document is the HRRC's Ninth Annual Report. I wish to express my appreciation to the members of the HRRC for their commitment to supporting this important endeavor.
